

Selko® AOmix M

Product Data Sheet

General

Selko AOmix M is a natural polyphenol-based blend which supports animals against oxidative stress and formation of free radicals. This is particularly important in highly performing animals where Selko AOmix M supports animal performance and the immune system, fertility, and antioxidant status of their offspring.

The components of Selko AOmix M have been selected for their high availability in the digestive systems of monogastric animals. Natural polyphenols in Selko AOmix M range from water soluble to biphasic to fat soluble to ensure optimal antioxidant status in every part of the cellular environment.

Selko AOmix M can be used to partially replace other antioxidant ingredients such as Vitamin E causing no differences in production performance.

Main ingredients

- Mixture of flavouring compounds
- Products from the processing of *Rosmarinus officinalis*, *Caesalpinia spinosa*, *Curcuma longa* and *Sophora japonica*
- Maltodextrin

Specification

- Particle size 90% < 850 µm
- Specific gravity 0.355 – 0.503
- Colour Characteristic
- Odour Typical
- Protein > 5%
- Fiber > 14%
- Fat > 3%
- Eugenol > 1.47%
- Ash > 5%

Recommended dosage for use

Dosage of Selko AOmix M	
Poultry	0.001 – 0.5 kg/mton
Pigs	0.001 – 0.5 kg/mton
Rabbits	0.001 – 0.5 kg/mton

Authorisation

Selko B.V. certifies herewith that the product complies with the EC admission standards; therefore the product can be sold freely in The Netherlands and exporting countries.

Selko B.V. is an approved feed-establishment, registration number: αNL 15256.

Safety

Applicable safety information can be found in the Safety Data Sheet.

Storage

Storage: Above -10°C.

Shelf life: 18 months after production date based on advised storage conditions.

Packaging

Dry products are generally available in

- 25 kg multiple layer paper bags with PE inlayer on a pallet
