

“BETTER HEALTH,
LESS MEDICINE”

EP100i

EP900

When health matters...

EP100I HAS MANY HEALTH PROMOTING QUALITIES AND IS ABLE TO PREVENT MUTATION OF BACTERIA, WHICH IS IMPORTANT IN THE FIGHT AGAINST ANTIBIOTIC RESISTANCE

- Rapeseed meal based
- Suitable to be used in the feeding of sows, weaners, growers and poultry
- Can solve Gram-negative bacteria such as Salmonella, Coli, and Campylobacter
- More even pigs with less treatments
- Reduces mortality
- Ideal for GMO-free production
- Contains live lactic acid bacteria, lactic acid, and enzymes
- Improves egg quality
- Improves gut health
- Prevents and helps recovery from Lawsonia

The natural way...

EP900 IS A BROAD-SPECTRUM HEALTH IMPROVER. A BASKET OF NATURAL ANTIOXIDANTS AND AGENTS CAPABLE OF DESTROYING PATHOGENS. SEAWEED HAS MANY ADVANTAGES IN FEEDING

- Contains antioxidants, many natural vitamins (B12), minerals, and essential omega-3 fatty acids
- Contains natural antibacterial and antiviral substances
- Is known to enhance the immune system
- Improves fertility and has an anti-inflammatory effect
- Works against Gram positive bacteria such as perferingens
- Ideal for GMO-free production

EP200

The highest quality for the animals that need it most...

THE PRODUCT HAS A GREAT VARIETY OF BENEFITS THANKS TO THE FERMENTATION PROCESS

- Improved protein and dry matter digestibility
- Based on soybean
- Produces a large amount of lactic acid in the animals
- Decreased buffer capacity (pH 4.5 in water)
- Breaks down galactosides
- Breaks down ANFs, lowers TIA
- Breaks down allergenic proteins
- Improved protein solubility
- Produces live lactic acid bacteria, lactic acid and enzymes which is maintained through the drying process
- Contains 75 kg of lactic acid per ton (value = €100)

EP200_{non-GMO}

- Based on non-GMO soybean
- The product has all the same benefits as EP200 – just GMO-free

EP 200 BASED ON
FERMENTED HI-PRO
SOYBEAN MEAL
